Great Health leads to Top Level Performance

TechMix, LLC is known all over the world for their full line of products which assist the nutritional support of equines, from the highest level of athletic competition to the everyday needs of the pleasure horse. This family owned and operated company has spent over 25 years dedicated to developing these products which span the areas of re-hydration/electrolyte balance, joints, hoof care, digestive systems, colic prevention and overall body/coat condition.

Not all Electrolytes are created equal! TechMix's BlueLite® products have been called the "rehydration drink for animals." BlueLite® products are non-salt based electrolytes – this is crucial considering too much salt can actually do more harm than good – with essential amino acids, vitamins and minerals. It is important to make sure horses are well-hydrated, especially when they expend energy during times of exercise, stress and heat. BlueLite products can be given before, during and after activities or environmental conditions where the horse is at risk of losing nutrients. Since two-thirds of a horse's body weight is water, electrolyte balance an important every day event for your horse.

A horse can lose fluid through sweating, defecation, urination, and respiration. Dehydration increases during stress, hot weather, heavy workouts, sweating, diet changes and disease. If electrolyte balance is not replenished, blood volume decreases and potential negative health effects such as sluggish behavior, colic, failure to perform, and shock can occur. TechMix's BlueLite products are available in three forms – powder, pellets and gel – making it easy and convenient to administer to horses both at home, during travel or at competitions.

Total Joint Complex was created to bring together four of the most important nutritional formulas...in on pail! TechMix's Total Joint Complex contains Glucosamine and Chondroitin for lubrication of joints and rebuilding of cartilage; it offers Biotin and Zinc for optimum hoof growth; it provides a shimmering show ring-ready coat with help from Omega 3 & 6; and lastly, Total Joint Complex includes Hyaluronic Acid to help improve immunity by absorbing vitamins and fighting free radicals. Whether your horse is ready for a total workout, needs nutrients to grow big and strong, or is young at heart – provide your horse with the nutrients needed for improved overall health by feeding Equine Total Joint Complex - all together in one convenient container...every day!

Hard Keepers pose many problems for horse owners, and TechMix has developed LIVE-BAC to improve issues such as poor utilization of feed, need for weight gain, maintaining weight and proper condition of coat and performance. Feeding Live-Bac every day will make sure your horse gets the beneficial bacteria needed to grow and maintain a strong and healthy condition. The bacteria, enzymes, FOS and yeast found in LIVE-BAC have been shown in research to enhance feed utilization – this means the horse can gain the most nutritive benefits from the forage and grain it receives, thereby leading to improved appetite and the ability to maintain a healthy weight. With the rising cost of feed, it makes sense to be sure your horse maximizes the benefits from the feed he is given. Feeding TechMix's Live-Bac as part of the daily diet will help owners get the most from their "feeding dollar."

Equine Total Joint Complex

Equine Hoof Protect

Every horse owner knows the importance of achieving and maintaining the best quality of overall health for their horse. When horse owners choose TechMix products to accomplish this goal, they can be assured their products are of the highest quality. TechMix products are manufactured in a new state-of-the-art facility using food grade technologies and micro mixing. With 25 years of dedication to animal health, TechMix products maintain a leading edge in the industry, for equine professionals and everyday horse owners alike. TechMix Equine is committed to the nutritional support of equine athletes and is a proud sponsor of the 2010 [Altech FEI World Equestrian Games](#).
